

FX Flow Pulse

EPFR data combined with Exante's expert analysis simplifies FX markets like never before.

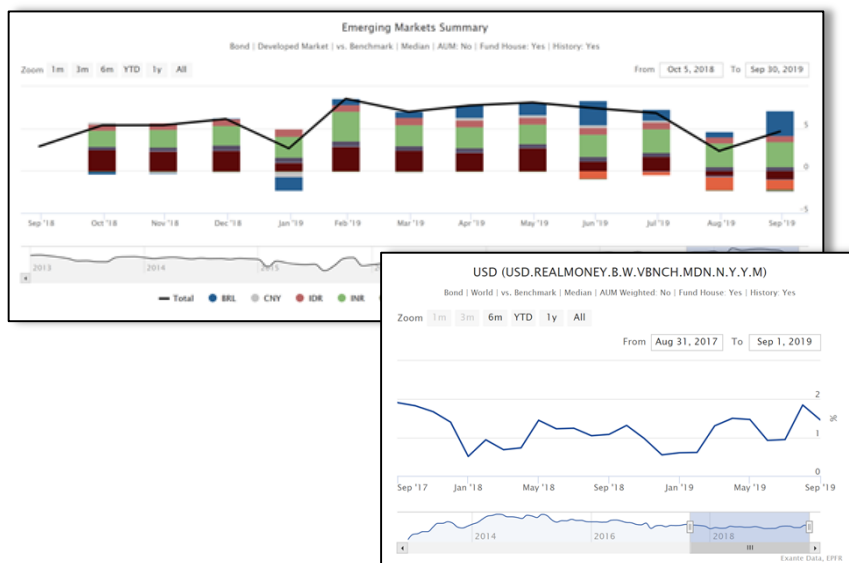

EPFR and Exante announce a new collaboration that delivers FX positioning indices and analysis driven by a unique dataset that captures global, real-money currency exposures inclusive of derivatives. This insight fills a critical gap for investors with global exposure.

What is it?

FX Flow Pulse includes FX indices, bi-monthly analysis and analytics on what's driving currency markets, along with directional implications.

Who uses it?

Macro funds, multi-strategy groups, real money managers, financial institutions, central banks and corporates are among market participants using FX Flow Pulse to generate alpha and mitigate risk across FX markets.

"Fundamentals drive currencies in the long-run. But in the shorter-term, precise positioning analysis is crucial to make efficient alpha decisions and to navigate risk."

Jens Nordvig, Founder/CEO Exante Data.
Named for five consecutive years as #1 currency strategist by Institutional Investor.

Key Benefits

Precise Metric

Indices are driven by real money FX positions that captures flows, derivatives and forwards for a timely and precise picture of FX exposure.

Broad Coverage

Indices update several times each month and provide you with detailed positioning information for both G10 and EM currencies. In addition, you receive expert interpretation of the data using our many other databases and models.

Leveraging Expertise

We have spent years optimizing this data giving us the ability to map complex, raw data into simple, transparent indices.

Privileged Data

Indices are based on a unique and proprietary data resource.

Transparent Methodology

Positions are in \$bn and benchmark deviations, rather than z-scores.
